BEESWAX PRODUCTS LTD.

Beeswax Furniture Polish

Available Sizes: 50g/1.75oz, 200g/7oz, 1134g/40oz

Made With Canadian Beeswax, Carnauba Wax & Deodourized Mineral Spirits

Our best-selling Beeswax Furniture Polish (also available in scented and pigmented varieties – see below) is a fine museum-quality polish crafted from an old family recipe from England.

This polish is made with the addition of a little carnauba wax to harden the shine and deodourized mineral spirit solvent. We use deodourized mineral spirit solvent because it contains no aromatic hydrocarbons, which are carcinogens.

Our polishes are easy to use and give a delightful shine on wood, stone, marble & concrete.

Note: The polish can be applied directly to bare or finished wood. You will get a gorgeous, soft beeswax shine which will become part of the patina as the years go by.

The Best Furniture Polish, From Home Use to the Silver Screen

If the Canadian film industry had an “Official Polish” it would certainly be Clapham’s! Set designers and costume departments use it on everything, and have discovered they can add various pigments and fillers for an extraordinary range of applications. Whether making things look beautiful or old and worn, our polish has been used on the sets of films and television series available across all major streaming services.

Lavender Beeswax Polish

This polish is made with the addition of lavender essential oil for a lovely natural scent.

White Beeswax Polish

This polish is made with the addition of titanium white for a lovely white wax finish.

Pigmented Beeswax Polish

These polishes are made with the addition of genuine earth & artist grade pigments for a lovely range of colours, including Olive, Van Dyke Brown, Patina and Black.

How to Use Our Beeswax Furniture Polishes

1. Apply a little with a lint-free cotton cloth. The secret is to use the polish sparingly; apply it very thinly over the surface.
2. Wait for about 5 minutes.
3. Buff lightly with a different cotton cloth or sheet.
4. If the wood is still dry, try a second application, or if it is really dry, try a third one!
5. Re-apply from time to time.
6. Sit back, relax, and enjoy your beautiful furniture.

Surface Area Covered

- 50g/1.75oz covers approximately 100 square feet
- 200g/7oz covers approximately 400 square feet
- 1134g/40oz covers approximately 2,264 square feet

Beeswax Furniture Polish Reviews

Quality Product

I've used Clapham's for years. The product is always consistently the best quality.

Bamboo

I used it on my bamboo fly rods and I really like it. It's very simple to use.

Burl Boxes

I bought cedar burl boxes (200 years old) and worked it into the finish... protects them really well and they look fabulous. Thank you. Easy to get into cracks and creases with an old soft toothbrush.

Wonderful products

I found out about Clapham's products from a friend who is a woodworker. We have used Clapham's polishes on our unfinished antique oak dining table, birch kitchen cabinetry, granite countertops, and leather items and we have been thrilled by the results. We recommend Clapham's products unreservedly!

Great furniture wax

Used the wax to treat and seal the wood armrests on new patio furniture. The wax is a soft cream, so it is easy to apply, and has a minimal pleasant scent. It penetrates the wood quickly, giving a lightly wet appearance. It dries quickly with minimal matte appearance, and when polished, does not leave an artificial high-shine. Very pleased with the workability of the wax, and the natural composition.

Wonderful Product

We have a 1890s barnwood table from Ohio that was looking dry. After one coat it is glowing and smells wonderful!

Your furniture will thank you

Clapham's Beeswax Furniture Polish is a superb product that assures that your furniture will endure for years. I only wish that I had discovered it many years ago. It brings real life to your most cherished pieces. Treating your furniture with Clapham's is like a spa treatment for your furniture. It will thank you for years to come.

Pleasant Smell and Great Wax

This product goes on easily, has a pleasant smell, and seems like it will be a durable wax finish.

Excellent product

I use this product to give my woodworking projects that extra finishing detail. Excellent product.

It's perfect!

I've used this in the past for smaller projects, and will use it for a much larger one.

Awesome product and results.

I am super happy with how my window sills and cedar benches turned out. So easy to use and amazing finish.

Best Beeswax Furniture Polish

Love the Clapham's Beeswax Furniture Polish as my furniture looks and feels great after I wax my oak furniture. Thank you for making an excellent product!

Can't go wrong with beeswax furniture polish. Very happy with my purchase

Same as their other products, awesome quality, and wonderful products

I have been a fan of your products for many years. Always delighted with their efficacy.

Great stuff!

Absolutely the best wood furniture treatment.

Amazing product! Lovely to apply. Great Canadian company! Would buy from them again for sure!

Excellent polish. I have used it many times on walnut, mahogany, cherry, and other hardwoods. Always a lovely shine.

So easy to use this natural product. Like spreading butter on toast.

Marvellous stuff! Best results when instructions followed closely, polishing several minutes after application of beeswax. My antique furniture not only shines but resists water and other stains.

I love this product!! So nice to apply....and the finish...incredible!!

Excellent product that makes the wood look clean and shiny

Wonderful

Lavender Beeswax Polish Reviews

Best polish ever

I have been using the Lavender Beeswax Polish & Salad Bowl Finish for years - absolutely love both products!!

Lovely Wax

I got the Lavender Beeswax Polish and the Salad Bowl Finish. Love them both.

Lavender Wax

Perfect light wax that worked well on furniture not previously heavily waxed. The smell is delightful, not too strong.

Lavender Beeswax Polish

This is my go-to wax for my old farmhouse table. It's wonderful.

Lavender beeswax

Great product.

Best Beeswax polish!

This polish is the absolute best you can own and I love the smell of Lavender!

Wonderful Polish

Easy and pleasant to use. Provides a warm sheen to wood with a lovely hint of lavender. Wonderful stuff, thank you!

Safe and natural way to finish a dresser

I was looking for a product for an unfinished dresser. Staining it or painting it wasn't an option as the fumes from those products bother me. (They also are a mess to apply!) The Clapham's beeswax (in lavender) was incredibly easy to apply and smells wonderful. The scent is a little overpowering at first, but fades nicely over time. Will definitely use again for future projects!

Lavender wax

Excellent wax for decorative items.

Great product

We use Clapham's to finish all our fine wood projects. Great product!

Polish for family's antique furniture

I am very pleased with the product which I have purchased a few times.

Lavender Beeswax polish

Terrific polish. Use it on all my furniture. I love the aroma and the softness of the polish.

Great find!

Love that I found this product for my platinum palladium prints. So easy to use.

Excellent product—as expected—have used it over many years.

Great stuff!

Lemon Beeswax Polish Reviews (discontinued)

Lemon Beeswax Polish

This product is easy to use, makes my wood furniture glow, and has a pleasant, light fragrance. I prefer using natural products like this one.

A New Glow

Used to bring life back to a 100 year old, quarter sawn oak curio cabinet that has its original finish.

White Beeswax Polish Reviews

Best product ever!

Can't be without Clapham's as an artist & film scenic artist. It's an absolutely essential product for working magic.

White Beeswax Polish

Products are outstanding! Love using them on my projects!

I love the whitewashed effect I'm getting on my wood artists panels.

Pigmented Beeswax Polish Reviews

Wonderful product.

The perfect product for my refurbished cabinets, the finish is warm, rich, the perfect hue of ebony. Couldn't be easier. Bravo to Clapham's.

Van Dyke Brown Beeswax Polish

This makes my job easier when it's time to give the antiques and other woods a nice protection. Hope this colour never goes away! Thank you for your help.

Wonderful product!

I was waxing a shelf unit that had previously been waxed with natural beeswax (decades prior). After sanding and stripping paint would still not stick, but Claphams pigmented polish did the trick! I got the beautiful stained look. It covers generously and leaves a beautiful sheen. Definitely will use again.

Pigmented Beeswax Polish

Love it...great product.

Great products

Great high quality products

Pigmented Beeswax Polish

Great product

I have used it on two projects, one I lightly sanded a water damaged cabinet top without stripping. It took only a few minutes. It's not perfect but it's much better than it was. For the other project I used stripper and removed all of the finishing product. Then I applied the product. It looks great and it was so easy.

The black pigmented beeswax brings out the grain of the wood and is very dramatic. Love this product.

Testimonials

I was first introduced to Clapham's Beeswax Polish as a student of James Krenov. Jim always spoke very highly of the product, and my students and I have been using it ever since.

Robert Van Norman
Resident Craftsman & Teacher, Inside Passage School of Fine Cabinetmaking
Roberts Creek, British Columbia, Canada

The wax is superlative. Very easy to apply, and it leaves a soft, buffable sheen that allows dust literally to be blown off the surface.

Christine Loehrlein
Former Student at Krenov School
Alameda, California, USA

I have been using Clapham's Beeswax products for the last twenty years, both the Salad Bowl Finish and the Furniture Polish. I love them both! In fact, I use the Furniture Polish in all of my flute care kits, allowing my customers to maintain the finish on their wooden flutes. Great products!

Geoffrey Ellis Flutes

Dear Claphams:

I am in Calgary, and have two sets of chairs from the 1800's – one, a set of English or French oak high-backed barley twist chairs; the other, a trio of Belgian oak chairs on lions' feet. Your polish has revived them and let them breathe. Heavily-carved chairs such as these run the risk of bits of carving dropping off, and your product seems to provide a stabilizing, moisturizing treatment. The colour your polish brings out is also wonderful. I did nothing with them for the longest time, thinking that there was a shellac or other finish on them from a hundred years ago, and that no surface treatment would penetrate. When I finally decided to use your beeswax polish, I found the wood definitely absorbed the polish to an extent. I don't know what goes on at the molecular level, but it makes them 'come alive' somehow. Because they are intricately carved and turned, I apply the wax with my hand in a soft glove, then use a medium-soft bristle brush (normally used for shoes) to remove the excess. I actually use the brush all over, including on any straight edges, as well as on the carving and turning. Thanks for a great product; the chairs have such a presence now, as individual works of art.

P.S. I have multiple chemical sensitivities, and cannot use normal furniture care products. Another aspect of your furniture polish which is so great, is that it gives someone like myself absolutely no difficulties.

All the best,
Darcia M
