

Food-Safe Beeswax Salad Bowl Finish

Available Sizes: 50g/1.75oz, 200g/7oz, 1134g/40oz

Made With the Best Natural Ingredients and No Harmful Chemicals or Additives

Our food-safe Beeswax Salad Bowl Finish is made with pure, 100% Canadian beeswax, carnauba wax, and mineral oil. This makes for a finish suitable for all things wood in the kitchen and beyond! Made in a Dedicated Nut Free Facility.

A Versatile Food-Safe Finish: From Kitchen to Children's Furniture

This finish protects wood and gives it a soft, lustrous shine. It is suitable for salad bowls, wooden spoons, and butcher blocks and can be used as a cutting board wax and as a food-safe countertop finish. Because of its natural processing and food-safe ingredients, it is the perfect finish for children's wooden toys and cribs too. Our Salad Bowl Finish also brings out the beautiful colours and unique features of the wood, and that's why wood artists use it to make their artwork pop.

How to Use Our Food-Safe Beeswax Salad Bowl Finish

1. Apply thinly with your hand, cloth or paper towel. It may take some time to dry, depending on the temperature and humidity of your home or workshop, but the piece can be used immediately.
2. When dry, buff to a light shine and ENJOY.
3. Re-apply when the piece looks dry.

Surface Area Covered

- 50g/1.75oz covers approximately 100 square feet
 - 200g/7oz covers approximately 400 square feet
 - 1134g/40oz covers approximately 2,264 square feet

Reviews & Testimonials

Best I've found

I've bought this Beeswax Salad Bowl Finish multiple times now. I tried many different products in the past and this was the best combination of finish, natural colour, and lack of odour that I was able to find. I would highly recommend it.

Longtime user, best stuff there is.

Accept no imitations! Been using this for a decade. Makes your salad bowls, cutting boards or any other wood object that comes in contact with food luxurious. It will make your things last and last.

Lovely, Aromatic Nourishment for Wood

I use this on my cutting boards, charcuterie platters, and all wood utensils. Applies easily with a lovely beeswax smell; I just use my fingers/palm. A little goes a long way; I let each side of the cutting board soak up what it wants overnight, then buff up with a cloth. Fantastic product that I've used for the last 3 years and was happy to buy another tub, as well as pick up a jar of the leather dressing, with which I am equally happy.

Great results and less oily than others

I've switched all my cutting boards, charcuterie inlay boards and bowl/dishes to Clapham's because the end results are better and have a much better, durable feel than other products which are more oily and less durable. I particularly find the overnight application with a final buffing to give outstanding results. It really makes the contrast of walnut inlays on maple charcuterie boards pop.

Great polish!

I purchased Clapham's Food-Safe Beeswax Salad Bowl Finish and used it on both my wooden salad bowl and tongs, as well as on a small cherrywood table that had gotten dry and bleached from the sun. It worked wonders and I need to buy some more because I can't find the jar! The subtle aroma of beeswax is heavenly and I am so happy to have found something organic and non-toxic that works so well.

Recommend and will get again

I love this, it is so soothing to have a bit of a sit with a bunch of wooden kitchen things and rejuvenate them. Afterward, they are so pleasant to handle and use. Clapham's is nice to use, it is easy, smells nice, there is no worry about it near food. It is a very nice gift as well.

It's a wonderful product.

I was so impressed with this product. Easy to use, beautiful results (my hands love it too). Have used it on many things (cutting boards, etc.) but it really helped out with an old Singer sewing machine that I wanted to "spruce" up. It gleams now and its value went way up. Beautiful!!!

Literally Glowing

I planned to use it on wooden cutting boards. Then I put it on my dining room table, my wooden slab headboard. Wow! I'm ordering the furniture polish! I have the fir framed windows and I can't wait to make my home glow with Clapham's!

Superb product

I had an old IKEA salad bowl whose finish cracked and salad dressing seeped into the cracks/wood after only a few uses. So I sanded off the finish and used this product to replace the old finish. What a miracle! I've made several salads without any dressing seeping into the wood. The bowl cleans beautifully with only a rinse/no soap. Love this!

Plus, great on Soapstone Kitchen Counters!

I use Food-Safe Beeswax Salad Bowl Finish on my wooden salad bowls and chopping boards, but I also use it on my unsealed soapstone kitchen countertops! It works wonderfully! Once a year all over and more frequently on heavy-use areas. The mild scent of beeswax is lovely!

Satisfied Customer

My son works in the trades as a project manager. I introduced him to “Salad Bowl finish a few years ago. The last tub was to refinish his cedar hot tub from Backcountry Recreations (N Delta, BC). I also introduced it to the guys in the woodworking shop here at Arbutus Ridge. Everyone loves it and is using it.

Clapham's Food Safe Salad Bowl Finish.

I've used Clapham's bowl finish for 8 years now. I tried similar products but keep coming back to Clapham's. The salad bowl finish is easy to use and never disappoints.

First time using product

Used beeswax as final coat on top of mineral spirit soaked olivewood cutting board. Applied two coats of beeswax with 12 hour drying period between coats. Buffed out after each coat. Got a very beautiful finished product. I probably used too much beeswax the first coat. Second coat used much less and it still came out fine. I will use this product on all future projects.

More than just a salad bowl wax

A little bit goes a long way but it also goes on so many things. I've used it for my chopping boards to keep them looking nice and keep them from cracking. I've also used it on my wooden easel and palette to keep the paint from seeping into the wood. The wax has a nice floral fragrance and it doesn't leave a greasy feel.

Beeswax Salad Bowl Finish

We really like it, one of the nicest products we have used on our cupboard doors and cutting board. My wife also loves how it keeps her hands moist and soft!

Delectable!

I use it on small bread boards & wooden handled flatware; it is very satisfying to handle with fingers. Lasts a nice long time even with light soap and water cleaning of utensils, boards, and bowls.

Awesome Results, Easy to Use

I use the Salad Bowl Finish once a month on my everyday maple cutting board. I've had it for 6 months and it still looks like new. I love that I can use my bare hands to spread the product on the board. I have also used it to protect an outdoor table and after a couple of months, the water is still not penetrating into the wood after it rains. I chose to try this for its ease of use. I am super happy with the results.

It's my go to for all my wood projects

I started using Food Safe Beeswax Salad Bowl Finish when I started experimenting with wood working. I bought my first sample at Lee Valley Tools in Ottawa and have been buying it annually in the large tubs. It is the only sealer I use. The ease of application and the way it brings out the beauty in my wood projects helps with my sales. I'm so happy it's what I use and that I don't have to try other products all the time.

It's my go to for all my wood projects

The first time I bought this product I was in a cutlery store. After reading the ingredients, I was sold on trying it. After using the product on wooden knife handles, chopping blocks, cutting boards, butcher block tabletop and even on the outside of my raised gardening beds to preserve the wood (yes, I did that, it's just that reliable) I am confident to endorse it to anyone seeking to preserve natural wood. It is environment friendly, the ingredients never change. So that's what sold me but what keeps me coming back is the service. I order directly from the company now and so far it hasn't let me down. Just try it already! You'll see :)

Wooden spoons

Really protects and gives my spoons such luster. I highly recommend this product for all things in the kitchen and dining room.

Highest Quality

This is the best. I use it on my cedar art pieces as a finish. Excellent quality, great price, great customer service. I highly recommend!

Wood counter saver

Brilliant product! I have been using this for a year on my laminate wood counter and it looks like new. No stains even around the sink and stove. I would recommend this product to protect any wood items.

Love this Stuff

I have used this stuff on endgrain cutting boards. My boards got soaked in a sudden rainstorm at a craftshow and the boards were just fine after a wipe to dry them off, incredibly easy to apply, feels odd to apply a wood finish with my fingers but it's great on your skin.

Butcher block sealer

Very good product, used it on our butcher block island at camp. It brought out the grains of our island.

Great for your hands too

I used this on my cutting boards and am very happy I did! Applied with my hands which made it even easier and my hands felt great too.

Supreme Commander only uses Clapham's Beeswax Salad Bowl Finish!

Great finish for all my woodworking projects. Two coats on my cutting boards results in a finish that lasts a long time and looks great. It really brings out the grain. Easy to use and clean up. The results are fantastic!

My Larch Wood Cutting Board Loves Clapham's

After researching options local to us in Portland, Oregon, I decided to order the real deal from Clapham's. Elbows up!

Love this product

I have used this product on all my cutting boards and my butcher block island that was just installed. It's so nice and easy to work with. I also use the lavender scented Beeswax Polish for my bathroom counter. The soft lavender scent is so nice.

Great for refinishing well used cutting board

After a year of hard use the cutting board was looking faded where the cutting was done. Looks great after using the wax finish.

Great product

Easy to use website, minimal shipping cost, product arrived very quickly, great quality!!

It's like Magic

Love this product for our custom walnut table

Perfect for my Bamboo Countertop

I've used it successfully for years

Perfect for wooden spoons!

A phenomenal product. My new go-to for finishing wooden spoons.

Simply the best

Love this product

Salad Bowl Finish

Great product - perfect finishing wax

Large butcher block table

Easy to apply and gives good protective finish.

Salad Bowl Finish

I have used this product for years. Love it! Always recommend it to friends

Good wax

Prompt delivery, nice people to work with.

Great product

Would use again

CLAPHAM'S BEESWAX PRODUCTS LTD.

This wax is terrific for caring for your wooden cutting boards and wooden salad bowls.

Food safe beeswax salad bowl finish

Wonderful product

Best wood treatment !!

By far, Clapham's wood treatment is the best for wood bowls, cutting boards etc.

Nice shine

I love the way my pieces look with the wax on them! Also great at protecting the wood!

Cutting board wax

I made a cutting board a while ago. This product was recommended to me as the last step. It was easy to use and didn't have much of a smell.

I already reviewed this beeswax product but I'd just like to add that after a year of using it the beeswax has proven so useful in many ways. I just found out that it can be used to stop door hinges creaking. It works!! My wooden counters still look like new thanks to this product. I recommend it to anyone who uses wooden cutting boards, etc.

Friend of mine recommended this and boy I wish I would've gotten this stuff a few years back, would've saved me a lot of headaches. Wonderful product

As always, this product is excellent. I even use it as a hand softener.

Absolutely a perfect product for end grain cutting boards!

This did a nice job of sealing my new cutting board.

Amazing product. Excellent quality, lovely smell.

Used products for years, always great results.

Works and smells great too

Amazing quality

Exactly what I wanted

The best

Dear Roger and Anne,

I received your salad bowl finishing product last week and just had to send you a note. First to recap, a certain someone in my family, who shall remain nameless, put salad bowls in the dishwasher. Need I say more? So I did a lot of research on the net before I called your company and purchased your product. I have to say, this was the best choice. Your salad bowl finish is fantastic. After a good sanding with very fine 600 grit paper and putting three to four coats, they came out looking great. In addition, my hands feel the best they have felt in years as they were very rough. Anyway, just wanted to say thanks and would recommend your products to anyone, as well as continue to order from you in the future.

Sincerely and thanks again,
Alan from Massachusetts

We at BAM Woodworks have been using Clapham's Beeswax Products for a few years now and have been very happy with the results. We use the food safe Salad Bowl Finish on our serving trays and spreading knives and on some of our wood earrings and pendants. It's very easy to use and what I really like is it doesn't change the colour of the wood but enhances it, bringing out the grain. Everyone I've dealt with is very helpful and shipping is super-fast. Very happy, thanks. Love the product.

Hello, I'm a furniture designer/craftsman in Los Angeles – work has been a bit slow so as an experiment in hopes of bringing in much needed income I've started making high end

professional quality cutting/chopping boards that are of a unique design. I've only done two small runs of them but people are snapping them up at an average cost of \$350 each. I use and recommend your Beeswax Salad Bowl Finish – it's a terrific product – I just wanted to take a moment to thank you for developing it.

I recently completed a couple of large cutting board and charcuterie pieces that I need to be food safe. Your salad bowl finish was recommended and I'm delighted to say that it elevates my finished work to the next level. Excellent stuff. I don't think that I can go back to using anything else.

I've used it on food ware, it was a nice sheen and kept the maple clear and bright. My dad uses it as well, it's how I learned about it. I've used the beeswax over cured tung oil, and over milk paint it gave a nice texture, warm and smooth.

Nicole M.

A homeowner & customer from Alexandria, VA was nice enough to send us a note saying "Thanks for your help, and for being accessible to coach on application" along with before and after photos of his use of our Salad Bowl Finish on his kitchen countertop. As you can see it makes quite a difference:
