

CENTRAL MASSACHUSETTS SPACEMODELING SOCIETY

CMASS is the major focal point in New England for the group of people whose common bond is an interest in building and flying model rockets. Rocketry is a safe, educational and enjoyable hobby that has been around since the mid 1950's. We have members as young as 5 and as old as you can get.

Our rockets are both vary from those common consumer model rocket kits you might buy at Toys-R-U's, to high power rockets which require skill and certification to build and fly. Our launches are (almost) always open to the public as both spectators and flyers. Most of our launches have a fee to cover field use expenses

Membership in CMASS will connect you with an energetic group of experienced people who share your interest in rocketry. Club members will also receive our newsletter, The Sentinel .

For more information about CMASS membership or activities you can sign on to our club's web page at <http://www.cmass.org>

If you are interested on becoming a member of CMASS, you can click on the CMASS Membership button on our Web page, or you can print out and send in a membership form.

Your Rocketry Adventure begins... When you join CMASS
