

Photographs are sometimes hard to reflect the proper color. The upholstery on the Lambright triple power recliner sofa and the captain's chairs is Ultraleather Champagne, 291-3719. The 360 Tour photos make it look white. However, in real life it is not white. Here are screenshots that are more accurately reflecting the real color. They are the same material. Note – The photo with the red UF in the corner, is a closeup of the fabric grain from the Ultraleather website. In person it looks and feels buttery soft like shown in the other two example photos from the Sailrite.com website. Also, the color compliments the colors of the porcelain floor tile.
